Wham 219 – Using a Laptop Computer

Turn on laptop computer and projector

Projector automatically defaults to the podium computer

For external laptop:

Plug in the HDMI cable to the laptop computer.

On projector remote control press "HDMI" input (on bottom of remote control).

If screen switch is required on laptop, press Ctrl and F8 simultaneously and select "Duplicate" display for the laptop image to appear on the projector screen.

Turn off computer and projector when finished; unplug HDMI cable.
